

1 ABSTRACT OF THE DISCLOSURE

2 A system and method for preparing imaging data for printing to a  
 3 requested web service from an application loaded on a user's computing device.  
 4 The present invention includes an imaging client computer having a web  
 5 browser for printing from the application to the requested web service, a  
 6 personal imaging repository associated with a particular user for storing  
 7 imaging data that is to be accessed by the requested web service, and a capture  
 8 driver for preparing the imaging data for transfer to the personal imaging  
 9 repository. The personal imaging repository is an exchange infrastructure  
 10 between the imaging data and available web services on the Internet.
